U.S. Seasonal Drought Outlook

Drought Tendency During the Valid Period

Valid for May 1 - July 31, 2022
Released April 30, 2022

Consistency adjustment
based on Monthly
Drought Outlook for
May 2022

Depicts large-scale trends based on subjectively derived probabilities guided by short- and long-range statistical and dynamical forecasts. Use caution for applications that can be affected by short lived events "Ongoing" drought areas are based on the U.S. Drought Monitor areas (intensities of D1 to D4).

NOTE: The tan areas imply at least a 1-category improvement in the Drought Monitor intensity levels by the end of the period, although drought will remain. The green areas imply drought removal by the end of the period (D0 or none).

FIRE RESPONSES

- Your Gallup Fire Department has responded to 16 brush / outside fires from March 1st, 2022 to May 1st, 2022.

Significant Wildland Fire Potential Outlook May 2022

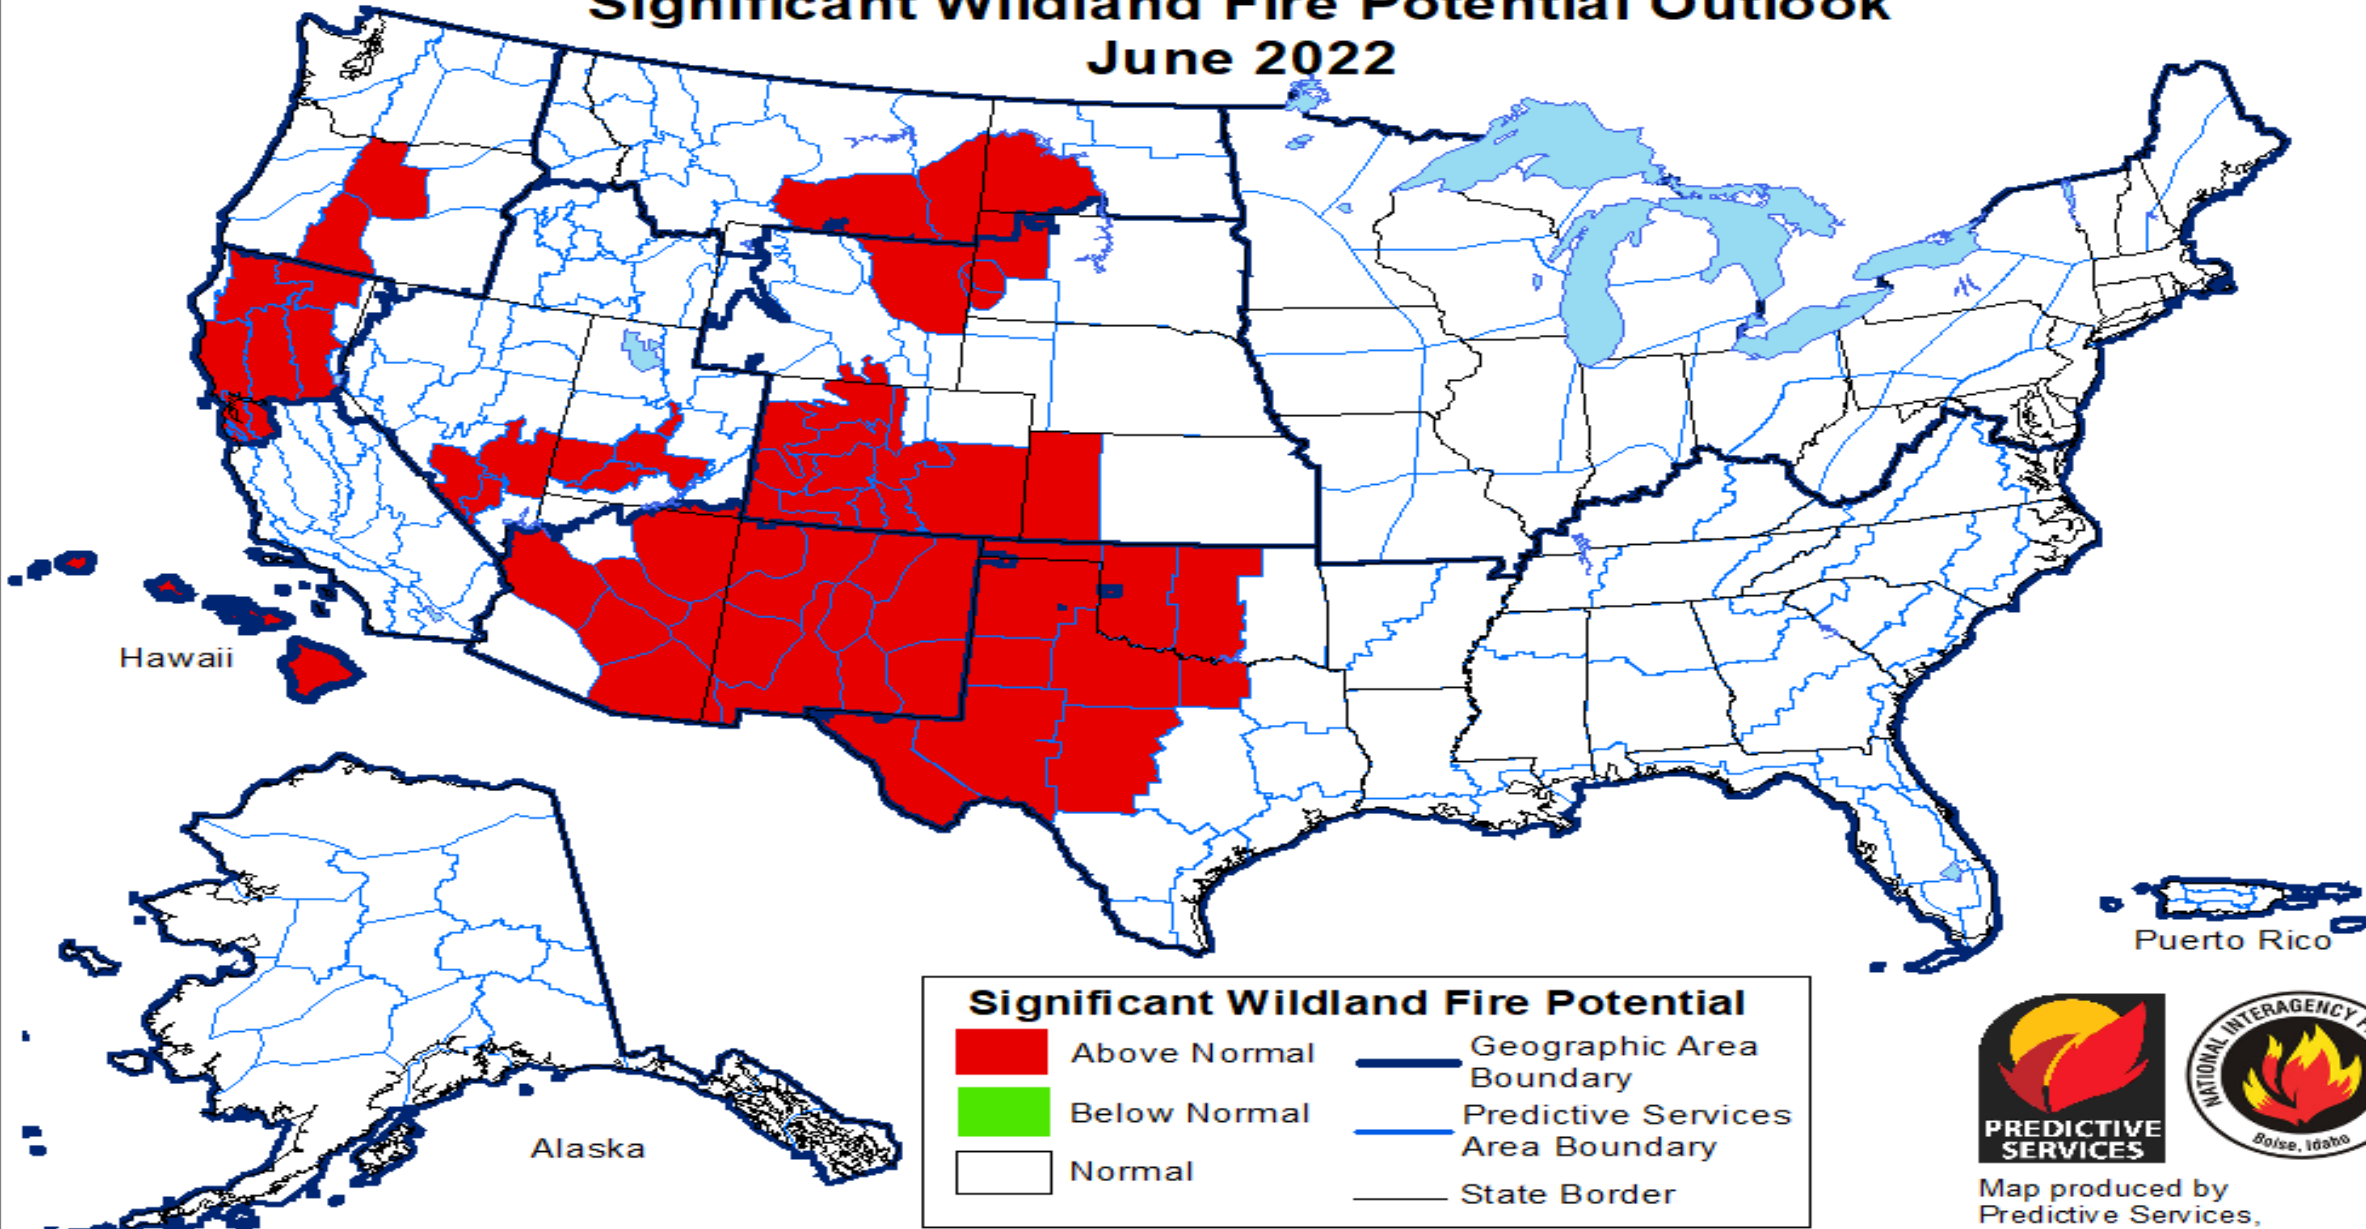

Above normal significant wildland fire potential indicates a greater than usual likelihood that significant wildland fires will occur. Significant wildland fires should be expected at typical times and intervals during normal significant wildland fire potential conditions. Significant wildland fires are still possible but less likely than usual during forecasted below normal periods.

FIREWORKS

- Chapter 60, Article 2C New Mexico Fireworks Licensing and Safety Act
- Does not allow municipalities to ban fireworks
 - With one exception
- Does allow municipalities to restrict fireworks based on extreme or severe drought conditions using a proclamation
- Fireworks are allowed to be sold between June 20th and July 6th
 - Except approved year round retailers
- If a proclamation is approved it is effective for 30 days

THANK YOU
