Re: WaFd Bank Gallup, NM

Dear Mr. Hall,

The City of Gallup Electric Department is in the process of converting the overhead electric power lines located in the alleyway between 1<sup>st</sup> and 2<sup>nd</sup> street and north of Aztec Ave. Directly north of your business is a billboard and neighboring business that will no longer be served from the alleyway and a new source of power is required. In your parking area is an underground transformer that we will need to access and serve the area north of your business as part of the electrical re-routing.

In order to access this underground transformer and not disturb the parking area, we would like to perform an underground bore from behind 214 W Aztec to the City's Electric site near the Public Restroom building. This bore will be approximately 5' to 6' in depth crossing Aztec Ave and Washington Federal's Parking lot. Attached is the propose design.

In order to achieve this, we will need a 10' PUE Easement for our electric line crossing your parking lot. Please review and comment. If any additional information is required please contact my office at (505) 863-1287.

Sincerely,

Marita Joe  
Senior Electrical Engineer Tech
